Users Guide

- App Version: 1.0
- Our Support Email: support@webecommercepros.com

Thank you for using the Checkout Text Editor by Web Ecommerce. If you have any questions, please feel free to contact us at support@webecommercepros.com

Step 1: App Installation

To install the app, all you have to do is go to the [BigCommerce App Store](#) and search for the app name: Checkout Text Editor. Store must be using the Optimized One-Page Checkout to use this app.

Step 2: How to Use

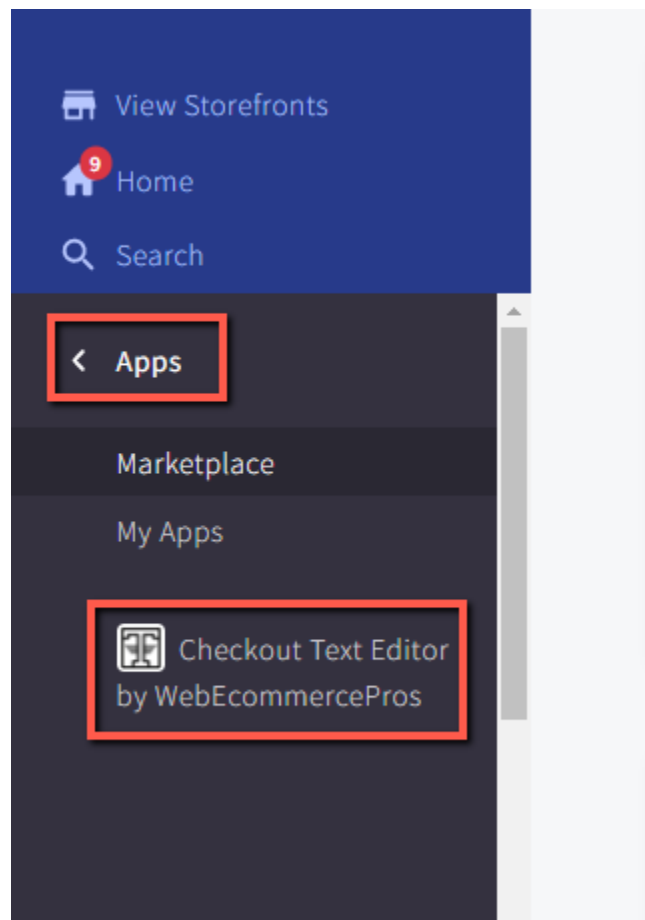

In this app, you can change the text of the checkout page. It enables you to write your own text for each label/description on the checkout page and to change the text inside each step. Once you have defined the text for any of the sections provided by the app, the text will be replaced for that section on your optimized one-page checkout. The app is Multi-Storefronts (MSF) compatible. So, you can define different texts for each storefront you have.

You can also disable the app so that the changes you made in the app don't reflect on the frontend. To do that, you will have to select Channels from the top-right dropdown menu and then toggle the button to make the app active or deactivate for the checkout.

The free trial period of the app is 7 days. After the trial period ends, you will need to subscribe in order to continue using it. You can unsubscribe it at any time and for each store separately. If you find any issue, please contact us at the support email.

Step 2: How to Use Examples

- Go to Apps > Checkout Text Editor

- Checkout Text Editor View:

Checkout Text Editor By WebEcommercePros Channel: Checkout Anywhere Home

Shipping Billing Customer Payment Order Summary Contact Support

Search For Text: Search Field
